## SEO FOR WORDPRESS - <https://yoast.com/wordpress-seo/>

This guide is by the YOAST folks, who produce the most popular plugins for SEO and WordPress. It is very, very technical and as such completely overemphasizes the technical side of SEO to the huge detriment of the marketing / content marketing side of the equation. So it shows its age and its old, traditional perspective on the subject. But it is a useful checklist of technical things to do in WordPress, for sure.

## PRESS RELEASES

Press Releases are an underutilized form of SEO. With the advent of “real-time search” and syndication services like PRWEB.com, Google rewards sites that have frequent press releases and blog posts. First, it rewards them with links from the Google search page directly to their press releases and blog posts - especially if they are created in an SEO-friendly way. Second, press releases can be part of your “link-building” strategy. And third, Google rewards sites with frequent, keyword-heavy press releases *that are Panda- and Penguin-compatible*, with a “better reputation” and thereby more frequent spidering. It’s a three-for-one benefit!

Here are the best **free** press release syndication tools on the Internet, ranked with the best services first!

## RANK

SEO is a lot like physical fitness! Just as you should measure your “Body Mass Index” (BMI), **before, during, and after** your fitness program, so you should measure your “Rank” on Google **before, during, and after** your SEO fitness efforts. The fact that your rank can vary greatly depending on your target keywords complicates rank measurement, but fortunately there are some great tools for automating this process. You can incorporate your rank measurement to identify strengths and weakness in your SEO strategy. Finally, if you are conducting paid Google Ads advertising, you can feed your rank data into Google Ads and thereby build on your SEO strengths and “target” your weaknesses for advertising support.

Here are the best **free** rank-checking tools on the Internet, ranked with the best tools first!

**SERP SURF** - <http://www.serpsurf.com/>

Website structure - the “organization” of your website - is an advanced element in effective SEO. While good page tags and link-building are more important and more powerful, effective website structure can mean the difference between securing Page 1 Position 1 and being downgraded to Page 3 Position 4, especially for “highly competitive” keywords. How you name your files, how you “reach out” to Google, and how you optimize your landing pages all combine to make a good SEO strategy, great!

Here are the best **free** website structure tools on the Internet, ranked with the best tools first!

# GOOGLE ADS

Formerly known as Google AdWords, Google Ads is the dominant advertising platform on the Internet. Google also controls YouTube as well as “remarketing” when ads “follow you around” the Internet. Here are the best resources for Google Ads, plus resources on the other major ad platforms such as Facebook, Twitter, and Instagram.

## KEYWORD TOOLS

As in SEO, keywords drive the advertising process on Google Ads. Here are the best keyword tools with a focus on advertising.

**TWINWORD KEYWORD TOOL** - <https://www.twinword.com/ideas/>

Billed as the first "LSI" (Latent Semantic Indexing) tool and the first semantic keyword research tool that can sort by relevance. Useful for keyword discovery and finding related words, especially when writing a blog post.

**Rating:** 5 Stars | **Category:** tool

**UBERSUGGEST** - <https://neilpatel.com/ubersuggest/>

This tool pulls the "autocomplete" data from Bing, and provides you an easy way to "shop" for keywords.

**Rating:** 5 Stars | **Category:** tool

**GOOGLE SUGGEST AND GOOGLE RELATED SEARCHES** - <https://www.google.com/>

From the Google home page, enter a target keyword phrase such as 'flower shop'. First, notice the keywords 'suggested' in the drop-down list - this is called Google Suggest, and can be very useful. Second, do an actual search, then scroll down to the VERY bottom, and look for 'Searches related to flower shop' to see searches related to your search term. Fantastic ways to identify potential target keywords and key phrases!

**Rating:** 4 Stars | **Category:** tool

**GOOGLE ADWORDS KEYWORD PLANNER** - <https://ads.google.com/>

Who got the data? Google got the data. Use the Keyword Planner for keyword discovery for both SEO and AdWords, but be sure to know how to use it. Not

the easiest user interface, and remember it ONLY gives data for EXACT match types. NOTE: you MUST have a paid account to use, and be LOGGED IN.

**Rating:** 4 Stars | **Category:** tool

**SEED KEYWORDS** - <http://www.seedkeywords.com/>

This is a wonderful human / machine tool. Gather your team together (or they can be in diverse cities). Create a prompt, such as 'your hungry and you love Italian food, what would you search for?' This then creates a 'workspace' and as people type in their ideas it consolidates them into a master list. Excellent and fun tool for keyword brainstorming!

**Rating:** 4 Stars | **Category:** tool

**DYNAMIC KEYWORD GENERATOR TOOL** –

<http://rustybrick.com/keyword-phrase-tool.php>

This tool enables you to enter your primary, secondary and even tertiary keyword phrases separated by comma (,) into the appropriate fields and click Generate Keywords to receive a robust list of keywords to copy and paste into your program of choice. For rank-checking, it makes it easy to generate a longer keyword list.

**Rating:** 3 Stars | **Category:** tool

**MERGE WORDS** - <http://mergewords.com/>

When you build your keywords list, especially for AdWords, you often want to take keywords and combine them into phrases. This is especially true for local search keyword phrases. This tool allows you to enter keywords and generate keyword lists.

**Rating:** 3 Stars | **Category:** tool

## DELETE DUPLICATES KEYWORD TOOL –

<http://angular.marketing/free-tools/delete-duplicates>

If you are building a long list for rank-checking, or for AdWords input, you often will unknowingly generate duplicates. Then when you pull your reports, they will often not correspond to your original, because rank checker and other tools auto-delete duplicates. Use this tool to prevent this from happening in the first place.

**Rating:** 3 Stars | **Category:** tool

## SEM RUSH - <https://www.semrush.com/>

Similar to KeywordSpy, this tool allows you to enter a domain or a competitor, and returns a list of AdWords keywords they are running under as well as their organic keywords. Use it to track a competitor, as well as to generate a keyword list (keyword discovery).

**Rating:** 3 Stars | **Category:** tool

## CLEVER ADS KEYWORD PLANNER - <https://jm-seo.net/4e018>

Generate and choose the perfect Google Keywords for your Google Ads campaigns with Clever Ads Google Keyword Tool Extension. Find the right Google Keywords for your Google Ads Campaigns. Quickly discover and analyze tons of profitable long-tail keywords related to your business.

**Rating:** 2 Stars | **Category:** App

## SPYFU - <http://www.spyfu.com/>

SpyFu will track your ads and competitors ads. Similar to KeywordSpy but not as good. Nonetheless, input a competitor's domain and you can see their ads and some basic information on their keywords and bids.

**Rating:** 2 Stars | **Category:** tool

## KEYWORD FINDER - <https://kwfinder.com/>

A very fun, interesting tool to discover keywords. Input some keywords, and get quick ideas for related terms, helper words, and more.

**Rating:** 2 Stars | **Category:** tool

**DANZAMBONINI KEYWORD TOOL** - <http://seo.danzambonini.com/>

Input a few keywords, and this tool will mix and match them into phrases.

**Rating:** 1 Stars | **Category:** tool

**KEYWORD TOOL** - <http://keywordtool.io>

Similar to Ubersuggest, this tool builds upon Google Suggest to provide a list of 'helper' words and phrases. For example, enter insoles and you'll see shoe insoles, insoles for runners, etc. It also provides questions containing the keyword users enter when searching Google and keyword suggestions for YouTube, Bing and Apple App Store. Great for finding helper words as part of keyword research. Additional related data like keyword search volume and CPC requires paid account.

**Rating:** 1 Stars | **Category:** tool

**KEYWORDSPY** - <http://www.keywordspy.com/>

KeywordSpy currently operates in USA, United Kingdom, Australia and Canada. Through this keyword tool and keyword software, you can perform advanced keyword research and keyword tracking to study what your competitors have been advertising in their AdWords campaigns and other PPC campaigns. You can get complete in-depth analysis, stats, budget, affiliates & ad copies of your competitors.

**Rating:** 1 Stars | **Category:** tool

**Rating:** 5 Stars | **Category:** resource

**TAG ASSISTANT FOR CHROME** - <http://tinyurl.com/tagasst>

If you're using AdWords and Google Analytics to track conversions, you need to verify you have the right 'tags' running as Javascript on your website.
